

[Separated detailed page for ReproBalance™ Fertility Formula - Detailed Page](#)

## **Medical Food for the Dietary Management of Metabolic Disturbances Affecting Female Reproductive Function**

**IMPORTANT: ReproBalance™ is a medical food that must be used under physician supervision as required by FDA regulations.**

ReproBalance™ is formulated to address the distinct nutritional requirements of women with documented metabolic disturbances affecting reproductive health that cannot be met through normal diet alone. This specialized formula is manufactured in our NSF GMP Registered facility to ensure the highest quality and purity.\*

## Metabolic Foundations of Reproductive Health

Specific metabolic disturbances can significantly impact female reproductive function. ReproBalance™ contains targeted nutritional compounds that address documented metabolic needs in women with conditions such as PCOS and related disorders that affect fertility.\*

Key nutritional components include:

- **Specialized amino acid profile** for reproductive tissue support
- **Physiological inositol complex** (40:1 ratio) for cellular signaling pathways
- **Bioactive methylation cofactors** for hormonal balance
- **Mitochondrial support compounds** for cellular energy production

These components work synergistically to address specific nutritional requirements that cannot be met through normal diet alone.\*

---

## Key Nutritional Components

ReproBalance™ contains a precise combination of nutritional compounds:

- **L-Arginine, N-Acetyl Cysteine, L-Carnitine, Glycine, and Taurine**
- **Myo-Inositol and D-Chiro-Inositol** (40:1 physiological ratio)
- **Active B vitamins** (methylfolate, methylcobalamin, pyridoxal-5-phosphate)
- **CoQ10, Alpha Lipoic Acid, and Resveratrol**

Each ingredient is pharmaceutical-grade and tested for purity and potency by independent third-party laboratories.\*

---

## Indications for Use

ReproBalance™ is specifically formulated for the dietary management of women with documented metabolic disturbances affecting reproductive function that cannot be adequately addressed through normal diet alone.

As defined by FDA regulations (21 CFR 101.9(j)(8)), this medical food must be used under physician supervision and is not intended for general nutritional use.

---

# Physician-Directed Protocol

ReproBalance™ is available exclusively through healthcare practitioners and must be used under medical supervision:

1. **Physician Evaluation:** Required prior to initiating use
2. **Personalized Dosing:** One packet daily mixed with 8-10 oz of water
3. **Consistent Use:** As directed by your healthcare provider
4. **Medical Monitoring:** Regular follow-up with your healthcare provider
5. **Healthcare Supervision:** A requirement for all medical foods
